

VelaSmooth **Cellulite Treatments**

While there are many heat and massage systems claiming to treat cellulite, *VelaSmooth* is the 1st clinically proven medical device to treat cellulite and non-invasively contour the body.

Elos technology combines bi-polar radio frequency with infrared light, plus tissue mobilization to safely & effectively re-contour the skins surface.

Leg Vein Treatments

Laser treatments are performed to repair and reduce leg veins 1-3 mm in diameter. Multiple treatments may be necessary depending on the size, depth, and color of veins.

About Our Services

As seen on Extreme Make Over and Oprah, Las Vegas OB/GYN uses aesthetic systems by *Syneron*. Each application uses *elos* (electro optical synergy) technology. *Elos*' unique combination of radio frequency and light isolates treatment areas allowing the surrounding skin to remain free from exposure. Unlike other systems, *elos* uses gentle pulses from two target energies allowing better results with low overall energy output, providing the highest level of comfort and safety. Simply stated, *elos* technology is proven to be the safest, most effective, pain free alternative for laser hair reduction, foto facial skin rejuvenation, acne treatment, wrinkle reduction, skin tightening, vein and cellulite treatments.

Foto Facial TM R F

Elos uses intense pulsed light to treat superficial, pigmented, benign vascular lesions, and hyperpigmented areas caused by acne scarring, sun damage, hormones and age, as well as unsightly redness caused by rosacea or broken capillaries, resulting in a smoother complexion, a more even tone, and younger looking skin.

ReFirme TM Skin Tightening

Stimulates new collagen production to lift, tighten, and smooth the skin while treating fine lines and wrinkles, paying special attention to sagging under the eyes and brow line, along with neck and jowl laxity; treating the entire face. Skin tightening can also be done on the abdomen to treat loose skin!!

Platinum Package:

Skin Tightening and Skin Rejuvenation:

Botox

BOTOX Cosmetic is a natural, purified protein derived from the Botulinum Type A toxin (Allergan). **BOTOX** Cosmetic is used to treat facial lines and wrinkles. Using an ultra-fine needle, **BOTOX** is injected into the skin to relax facial muscles by blocking nerve impulses and relaxing the muscles; the skin becomes smoother, creating a more natural and relaxed appearance. The number of injections used is customized for each patient depending on his or her needs. Typically, results last 3-4 months. Continuous treatments are necessary in order to maintain the effects of **BOTOX** Cosmetic.

Chemical Peels

Chemical peels are beneficial in helping to improve the visible signs of aging or sun-damaged skin. And for the adjunctive treatment of various dermatological conditions including acne, dry skin, hyperkeratosis, and hyperpigmentation. NeoStrata professional products are uniquely formulated with alpha hydroxiacids (AHA's), polyhydroxyacids (PHA's), and bionic acids to enhance therapeutic treatments and skin care recommended by physicians.
